GLOBES AND BASES

Acrylic globes come out in five standard dimensions: $\Phi 200\text{mm}$, $\Phi 250\text{mm}$, $\Phi 300\text{mm}$, $\Phi 400\text{mm}$, $\Phi 500\text{mm}$ and three colours: opal, fume and clear. Globe represents an easy-going fixture that has various applications: on posts, at entrance gates and against walls. Globes are the most common fixture used in urban illumination. Bases come out in plastic and aluminium materials both with porcelain lampholder. Plastic bases are used for post placement of globes, while the aluminium bases are applied in wall and pendant fixtures.

PRODUCT FEATURES Acrylic globes

- > Acrylic (PMMA) globe
- > UV resistant material
- > Opal, fume and clear diffuser
- > This series conforms to EN60598-2-1 & EN60598-1:97+A1:98 European Standards **CE**

PRODUCT FEATURES Acrylic globes with plastic base

- > Acrylic (PMMA) globe with polyamide (PA) base
- > UV resistant materials
- > Opal, fume and clear diffuser
- > E 27 porcelain lampholder included
- > IP65  
- > Class II 
- > This series conforms to EN60598-2-1 & EN60598-1:97+A1:98 European Standards **CE**
