

Instruction manual of DE 19611

Please read the instruction manual carefully before you use the product.

- 1 The lamp is delivered with the empty lithium battery. To get the full power of the lithium battery, please charge it before the first use completely. When charging, the indicator light at the bottom of the base is orange. When fully charged, it turns green. The average charging time is about 4 hours. The attenuation of lithium battery is not quality problem. To enlarge the lifetime of the lithium battery, it should be recharged in regular intervals. The lamp need to be charged every three months if the lamp is not used, otherwise the lithium battery will be wrong.
- 2 The lamp is made for outdoor use. Protection rating: IP44.
- 3 The best temperature for use is between 3 and 45 degrees centigrade. Lower or higher temperatures can shorten the lifetime of the lithium battery. The lamp should not be used under direct sunlight.
- 4 Please use the included USB cable to load the lithium battery.
- 5 Please charge the lamp indoor. To correctly charge the lamp, we recommend that you:
1. Remove the protective silicone cover and insert the charging cable to **the type C port**; 2. Put the **plug of the adaptor** into the electrical socket; 3. When fully charged, disconnect the plug from the electrical socket and remove the charging cable.
- 6 To clean the lamp we recommend to use a soft cloth. If needed, the cloth can be humid with a little bit of water. Do not use alcohol or other aggressive cleaning materials.
- 7 **To start the lamp with the touch switch On/Off and smooth dimming from 5%-100% and 100%-5%.**
- 8 Technical Data: Power: 5.5W
Portable and rechargeable lamp.
1X1800mA lithium battery.
Working time: 6 hours light on maximum brightness
Recharging time: 4 hours, when the lithium battery is completely empty.
Input Voltage : 5V 1A
